

OBJECTIVE				
To build a career in reinsurance catastrophe analytics, combining Insurance and Risk Management training with quantitative modelling skills to help price and manage natural catastrophe risk.				
EDUCATION				
Course	Specialization	Institute	Year	%
PGDM	Insurance and Risk Management	National Insurance Academy	2027	7.3/10
BMS	Finance	University of Delhi	2024	75.14
XII	Science	Sainik School Tilaiya	2021	76.80
X	General	Sainik School Tilaiya	2019	90.20
INTERNSHIPS				11 Months
Aviva Life Insurance Company India Ltd		Risk Management Intern	May 2026 – Jul 2026	
- Built a Power Query dashboard prototype consolidating risk data for CRO-office reporting, prompting the CISO to commission a full dashboard project. - Built 3 compliance trackers covering 40+ controls, conducted 2 IRDAI cyber gap assessments & supported ERM/SteerCo governance reporting. - Created a 10-edition Risk Newsletter, approved by CRO & CEO for org-wide circulation.				
Extern+ IgniteXL Ventures		AI Powered VC Deal Sourcing Externship	Mar 2024 – Apr 2024	
- Researched 30+ early-stage startups in Health and Wellness sectors. - Developed investment thesis and prepared pitch decks to support decision making.				
University of Gothenburg, Sweden		Research and Administrative Intern	Feb 2023 – Sep 2023	
- Assisted in a research project under Prof. Dr. Ravi Kant Pathak, coordinating project operations. - Designed and built an experimental Ozone Generator at 1/10th of standard cost, improving efficiency.				
PROJECTS				
Catastrophe Loss Modelling — OasisLMF (PiWind) & Excel - Ran an open-source cat model end to end across hazard, exposure, vulnerability and financial modules; generated and interpreted OEP/AEP curves and per-contract expected loss for a sample portfolio. - Built an Excel cat financial module applying XOL terms to a 1,000-year simulated event set, deriving OEP/AEP curves, layer expected loss and rate on line.				
SA-CCR Counterparty Credit Exposure Model — Excel (BCBS 279) Built a 12-trade netting set engine across IR, FX, equity & commodity with supervisory delta, maturity factors and correlation-based hedging-set aggregation; $EAD = \alpha (RC + PFE) = \\$23.5M$ on a \$13.9M add-on.				
Stochastic Simulation Models — Vasicek & GBM, Excel Simulated mean-reverting short-rate paths (Euler discretisation of $dr = a(b-r) dt + \sigma dW$) validated against the closed-form solution, and GBM asset paths incorporating the Itô drift correction.				
ACHIEVEMENTS				
Positions of Responsibility	- Vice-Captain, Inter-house Football Championship - Vice-Captain, Inter-house Hockey Championship			
Certifications	- Licentiate from Insurance Institute of India (III) - Cleared Actuarial Common Entrance Test (ACET) - Introduction to Financial Engineering and Risk Management by Columbia University - Research Analyst – SEBI (NISM) - Investment Analysis and Portfolio Management – NSE (NCFM) - Financial Globalization, Capital Flows, and the Global Financial Cycle by ADBI - Countering Trade-Based Money Laundering by World Bank Group			
Skills	Reinsurance: XOL, per-occurrence & aggregate structures, EP curves (OEP/AEP), catastrophe loss modelling Quantitative: Monte Carlo simulation, stochastic modelling (GBM, Vasicek), Basel/BCBS capital frameworks Technical: Python (NumPy, pandas), Advanced Excel, Power Query, - Blog and Essay Writing — published article on BIS Project Agora - Business Research and Report (Questionnaire Design)			
Extra-Curricular	- Bronze Award for “The Queen’s Commonwealth Essay Competition” 1st position in KAPITALISTA (mock investing competition) - Semi Finalist in “Scientist for a day competition” by NASA - Best Performer in International Space Science Essay Competition			
OTHER INFORMATION				
- Volunteered with ‘WWF India’ in events such as Cyclothon, Bird Festival & Earth Hour. - Volunteered at ‘Hamari Pahchan NGO’, supporting Social Media Marketing campaigns and Fund-raising initiatives.
